

KIMBERLITE

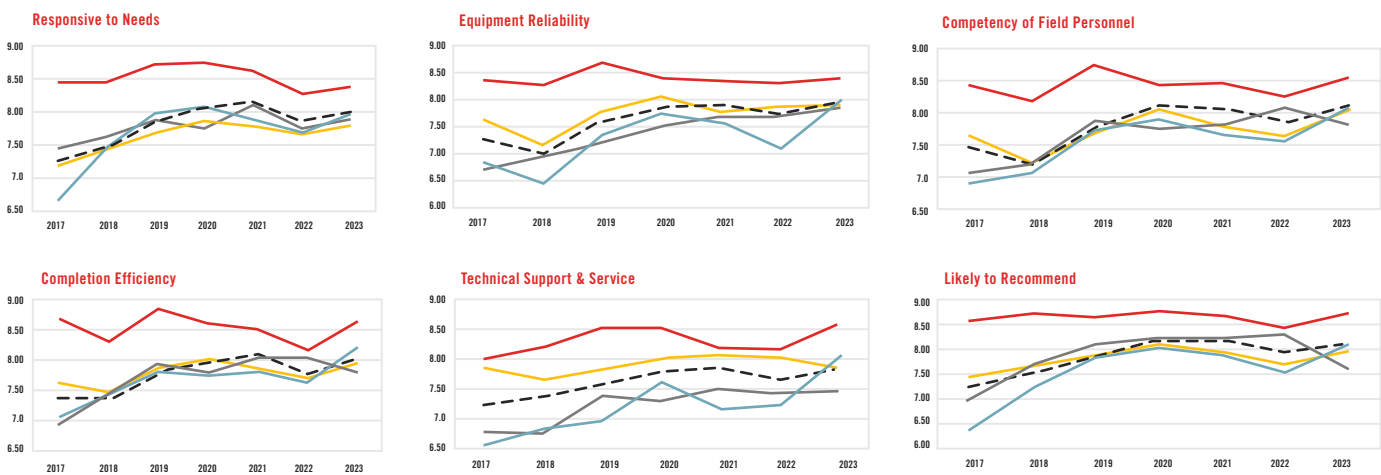

# DELIVERING SUPERIOR SERVICE

At Liberty, we bring great people together in a culture of excellence to deliver superior service quality to our partners (customers). We are leaders in developing and commercializing technology that offers the world safer, cheaper, and cleaner energy at scale.

Liberty began as a pure-play provider of hydraulic fracturing operations. We have become an integrated supplier of all the supporting services required to execute the frac operations. Harmonizing these parts into one is how Liberty has distinguished itself as the leading completion provider in North America, based on survey data from the industry's top research firm, Kimberlite.

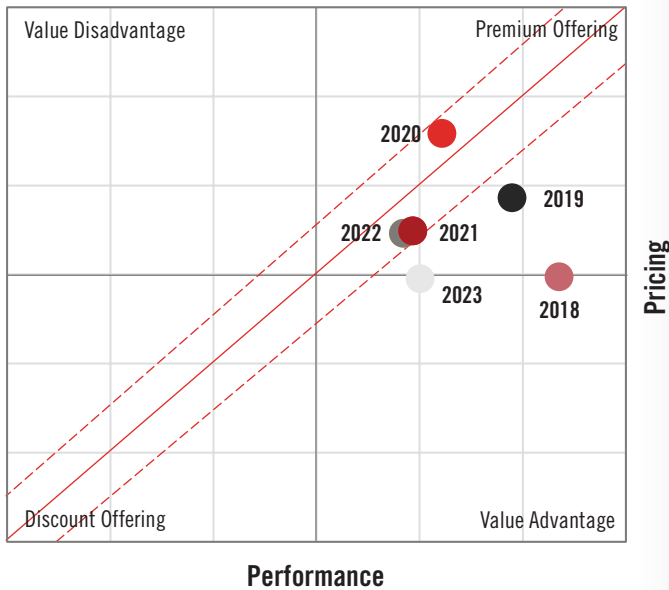

Liberty's advanced technology enables our field personnel to continue **leading our industry** in frac performance.

Big 4 Performance Ratings Trend vs Industry Average (2017 to 2023) — — — Industry Average — Liberty Energy — Company 1 — Company 2 — Company 3

Liberty is the only service company to be classified as **“Premium Offering”** in all years participating in the Kimberlite Survey 2018-2023

KIMBERLITE
