

TESTING CAPABILITIES

Including labs in the USA and Canada

www.libertyenergy.com

WATER ANALYSIS

- Water Composition Analysis
- pH, SG, and Oxidization-Reduction Potential testing
- CO₂ Solubility and H₂S detection
- Naturally Occurring Radioactive Material (NORM) detection
- ICP-OES
- X-ray fluorescence (XRF)
- Ion Chromatography and ISE probes
- Spectroscopy: IR, UV, Visible
- Polyacrylamide

STANDARD OILFIELD TESTS

Scale tendency evaluation:

- Bottle testing
- Dynamic scale loop
- Software modeling

Clay control testing from:

- CST
- Roller oven stability testing
- Bulk hardness tester
- Packed column testing

Emulsion tendency & Stability testing

Bacteria testing:

- Bug bottle serial dilution with incubators
- 2nd gen luminometer
- BART testing

Surfactant evaluation with Drop Shape Analyzer

Vapor pressure & flashpoint

Acid corrosion tests & Coupons

FLUID RHEOLOGY & PROPPANT TESTING

- Friction loop testing
- Anton Paar low shear, high temp viscoelasticity
- Fann35 low temp hydration and viscosity
- Oscillatory rheometer viscoelasticity
- HPHT fluid loss
- API sieve analysis with Ro-tap
- Turbidity testing
- Camsizer for particle roundness, sphericity, mesh
